Developer Team

Aniya Games Studio is a team of two from Guangdong, China (started out working solo and ended up as a couple). Out of the love for games, the developers have developed “Pathless Woods” , inspired by Byron’ s poem. There is a pleasure in the pathless woods, to embrace nature with its endless spring of inspiration; to express with abandon in the face of nature. We hope that every player can experience nature and the joys of survival in this mini world!
